

WAREHOUSE SERVICES PROVIDER

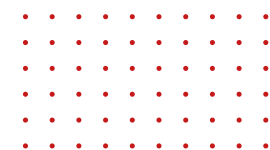

# SD GLOBAL LOGISTICS

Smarter logistics. Simplified growth.

---

# WELCOME TO OUR COMPANY

SD Global Logistics is a technology-enabled warehousing and 3PL partner that helps brands move faster, scale smarter, and keep costs predictable. We design flexible storage and distribution solutions—dedicated, shared, or on-demand—to meet the needs of e-commerce, retail, manufacturing and other fast-moving industries across India.

## PURPOSE

SD Global Logistics was built to close the gaps businesses face in service quality, transparency and accountability in warehousing and logistics. Our purpose is to remove operational friction so clients can focus on growth.

# KEY FACTS & CAPABILITIES

## YEARS OF OPERATION

**6+ years** of experience executing and optimizing logistics and warehousing operations across India.

## CLIENT SATISFACTION

**250+ happy** clients spanning diverse industries—e-commerce, retail, pharmaceuticals, electronics

## NATIONWIDE REACH

**50+ strategically** located warehouse facilities across India, enabling efficient delivery and reduced transit times.

## SCALE & CAPACITY

**Over 1,000,000 sq. ft.** of managed warehouse space—offering the scale and flexibility businesses need.

# WHAT WE DO

WE OFFER END-TO-END WAREHOUSING AND LOGISTICS SERVICES, INCLUDING:

▶ **Third-Party Logistics (3PL):** Integrated storage, pick-pack, and distribution services to streamline your supply chain.

▶ **On-Demand & Shared Warehousing:** Flexible space without long-term leases—scale up or down and only pay for what you use.

▶ **E-commerce Fulfillment:** Fast, accurate order processing and shipping that enhances customer satisfaction.

▶ **Reverse Logistics Management:** Efficient handling of returns—including inspection, refurbishment, and value recovery.

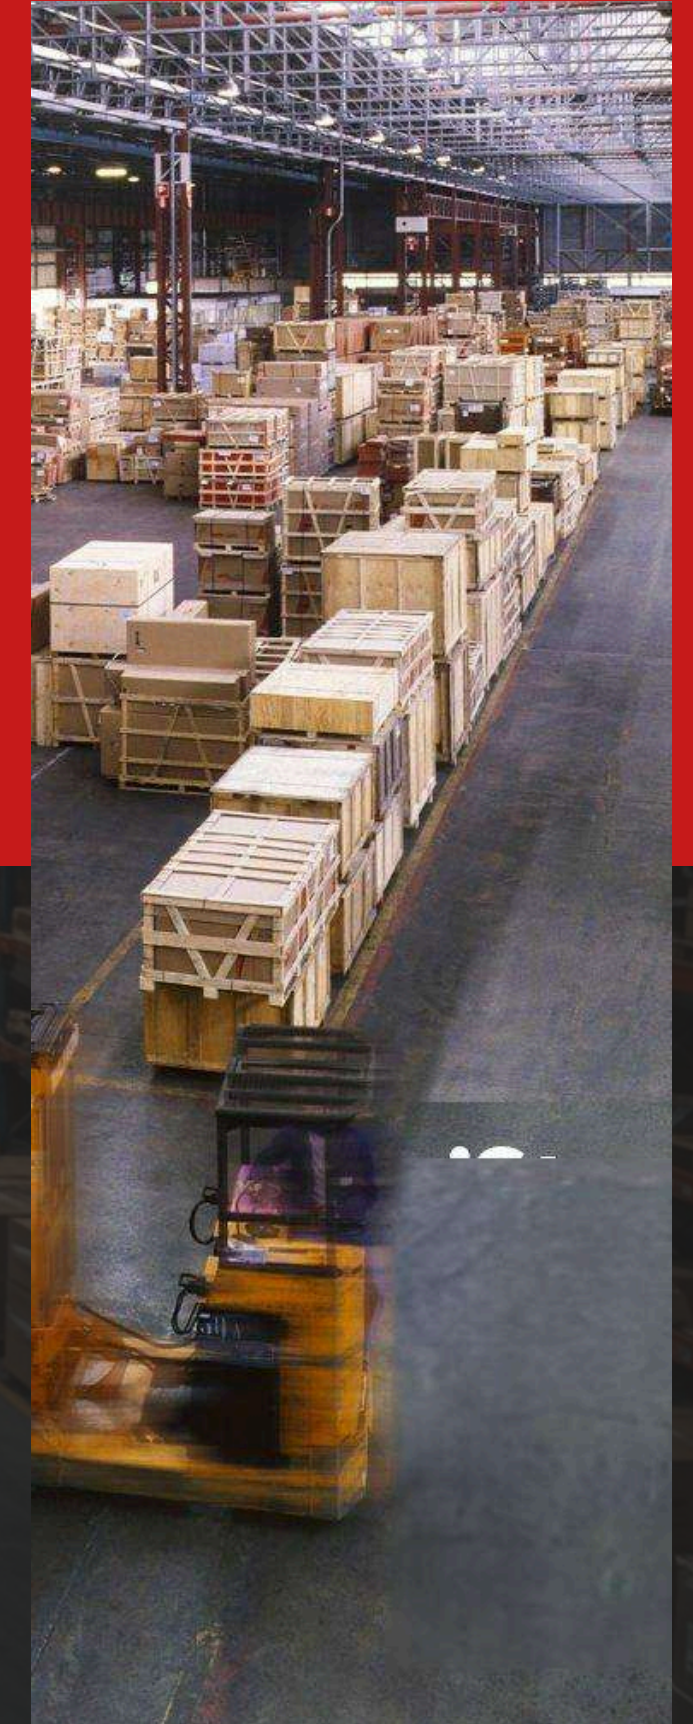

# WHAT WE DO

**Transportation & Distribution:** Reliable pan-India transportation with robust last-mile capabilities.

**Technology Solutions:** WMS/ERP integration and TMS tools for real-time visibility and automated control.

**Supply Chain Consulting & Advisory:** Process design and optimization for cost savings, speed, and resilience.

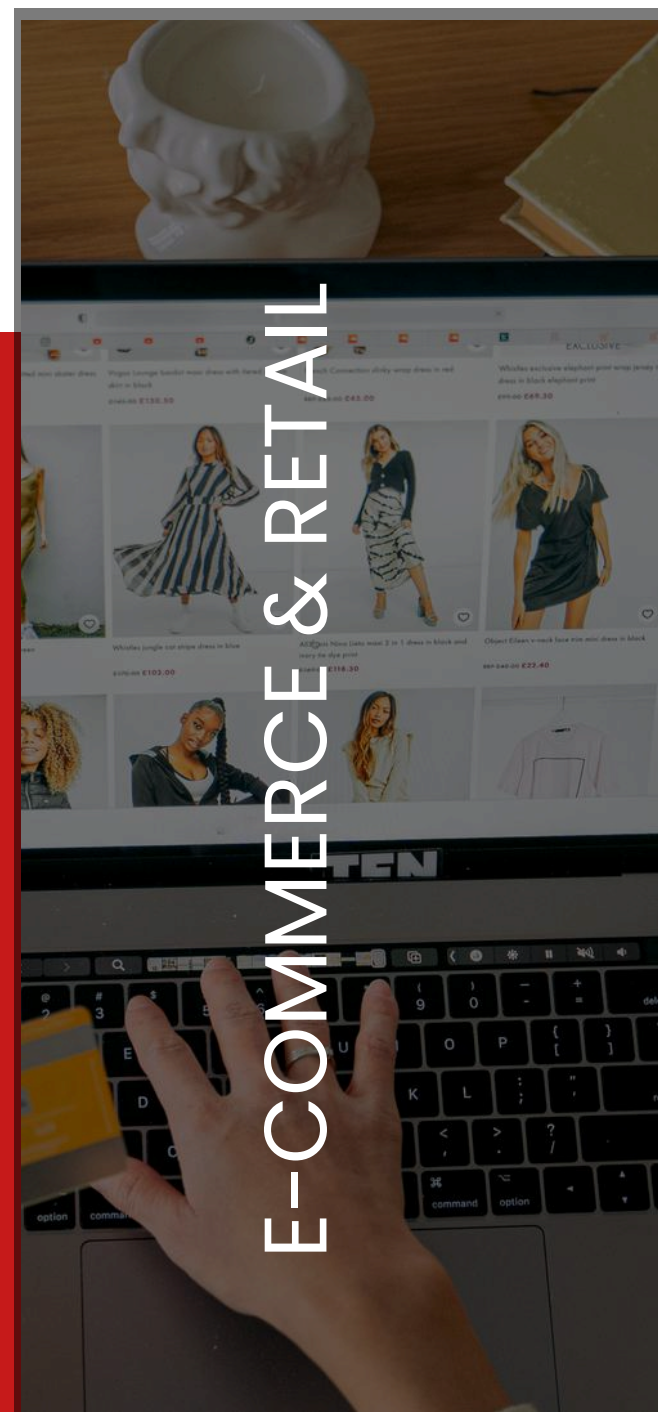

**Value-Added Services:** Labelling, kitting, repacking, and other custom handling to get products shelf-ready.

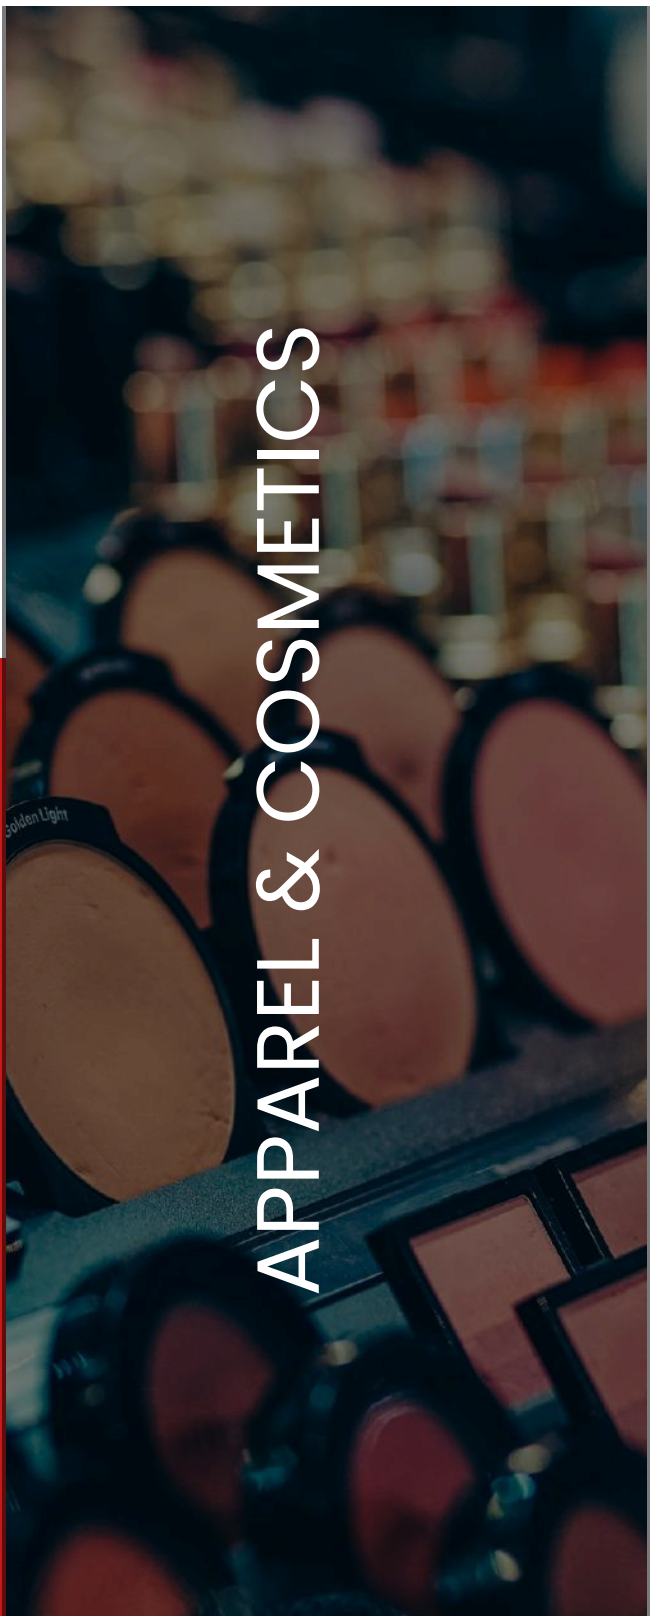

# INDUSTRIES WE SERVE

We adapt our protocols to meet each industry's specific regulatory, safety, and handling requirements.

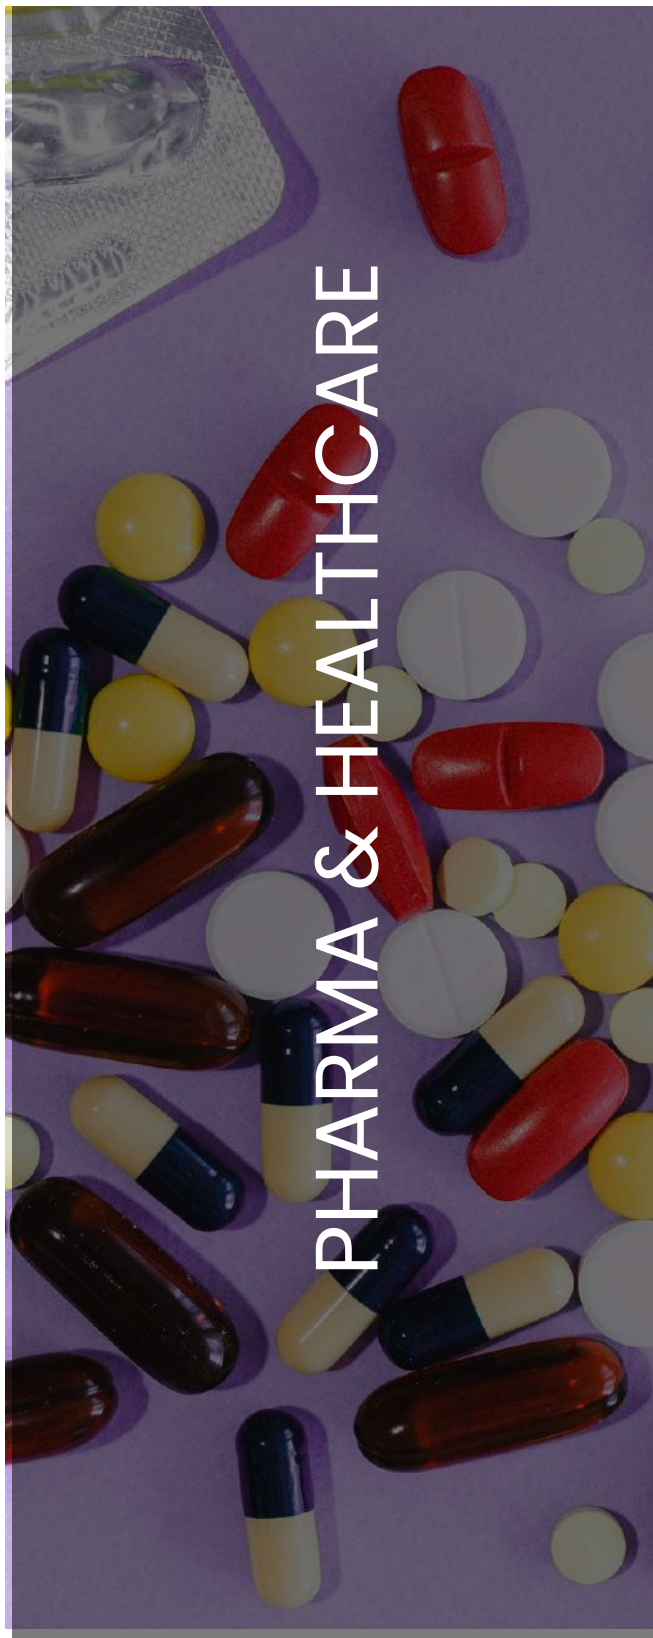

E-COMMERCE & RETAIL

APPAREL & COSMETICS

ENERGY & INDUSTRIAL  
CHEMICALS

PHARMA & HEALTHCARE

ELECTRONICS & AUTOMOTIVE

# TECHNOLOGY ADVANTAGE

## In-House Warehouse Management System (WMS)

- Real-time inventory tracking at SKU level
- Seamless ERP, marketplace & API integration
- Automated dashboards for transparency

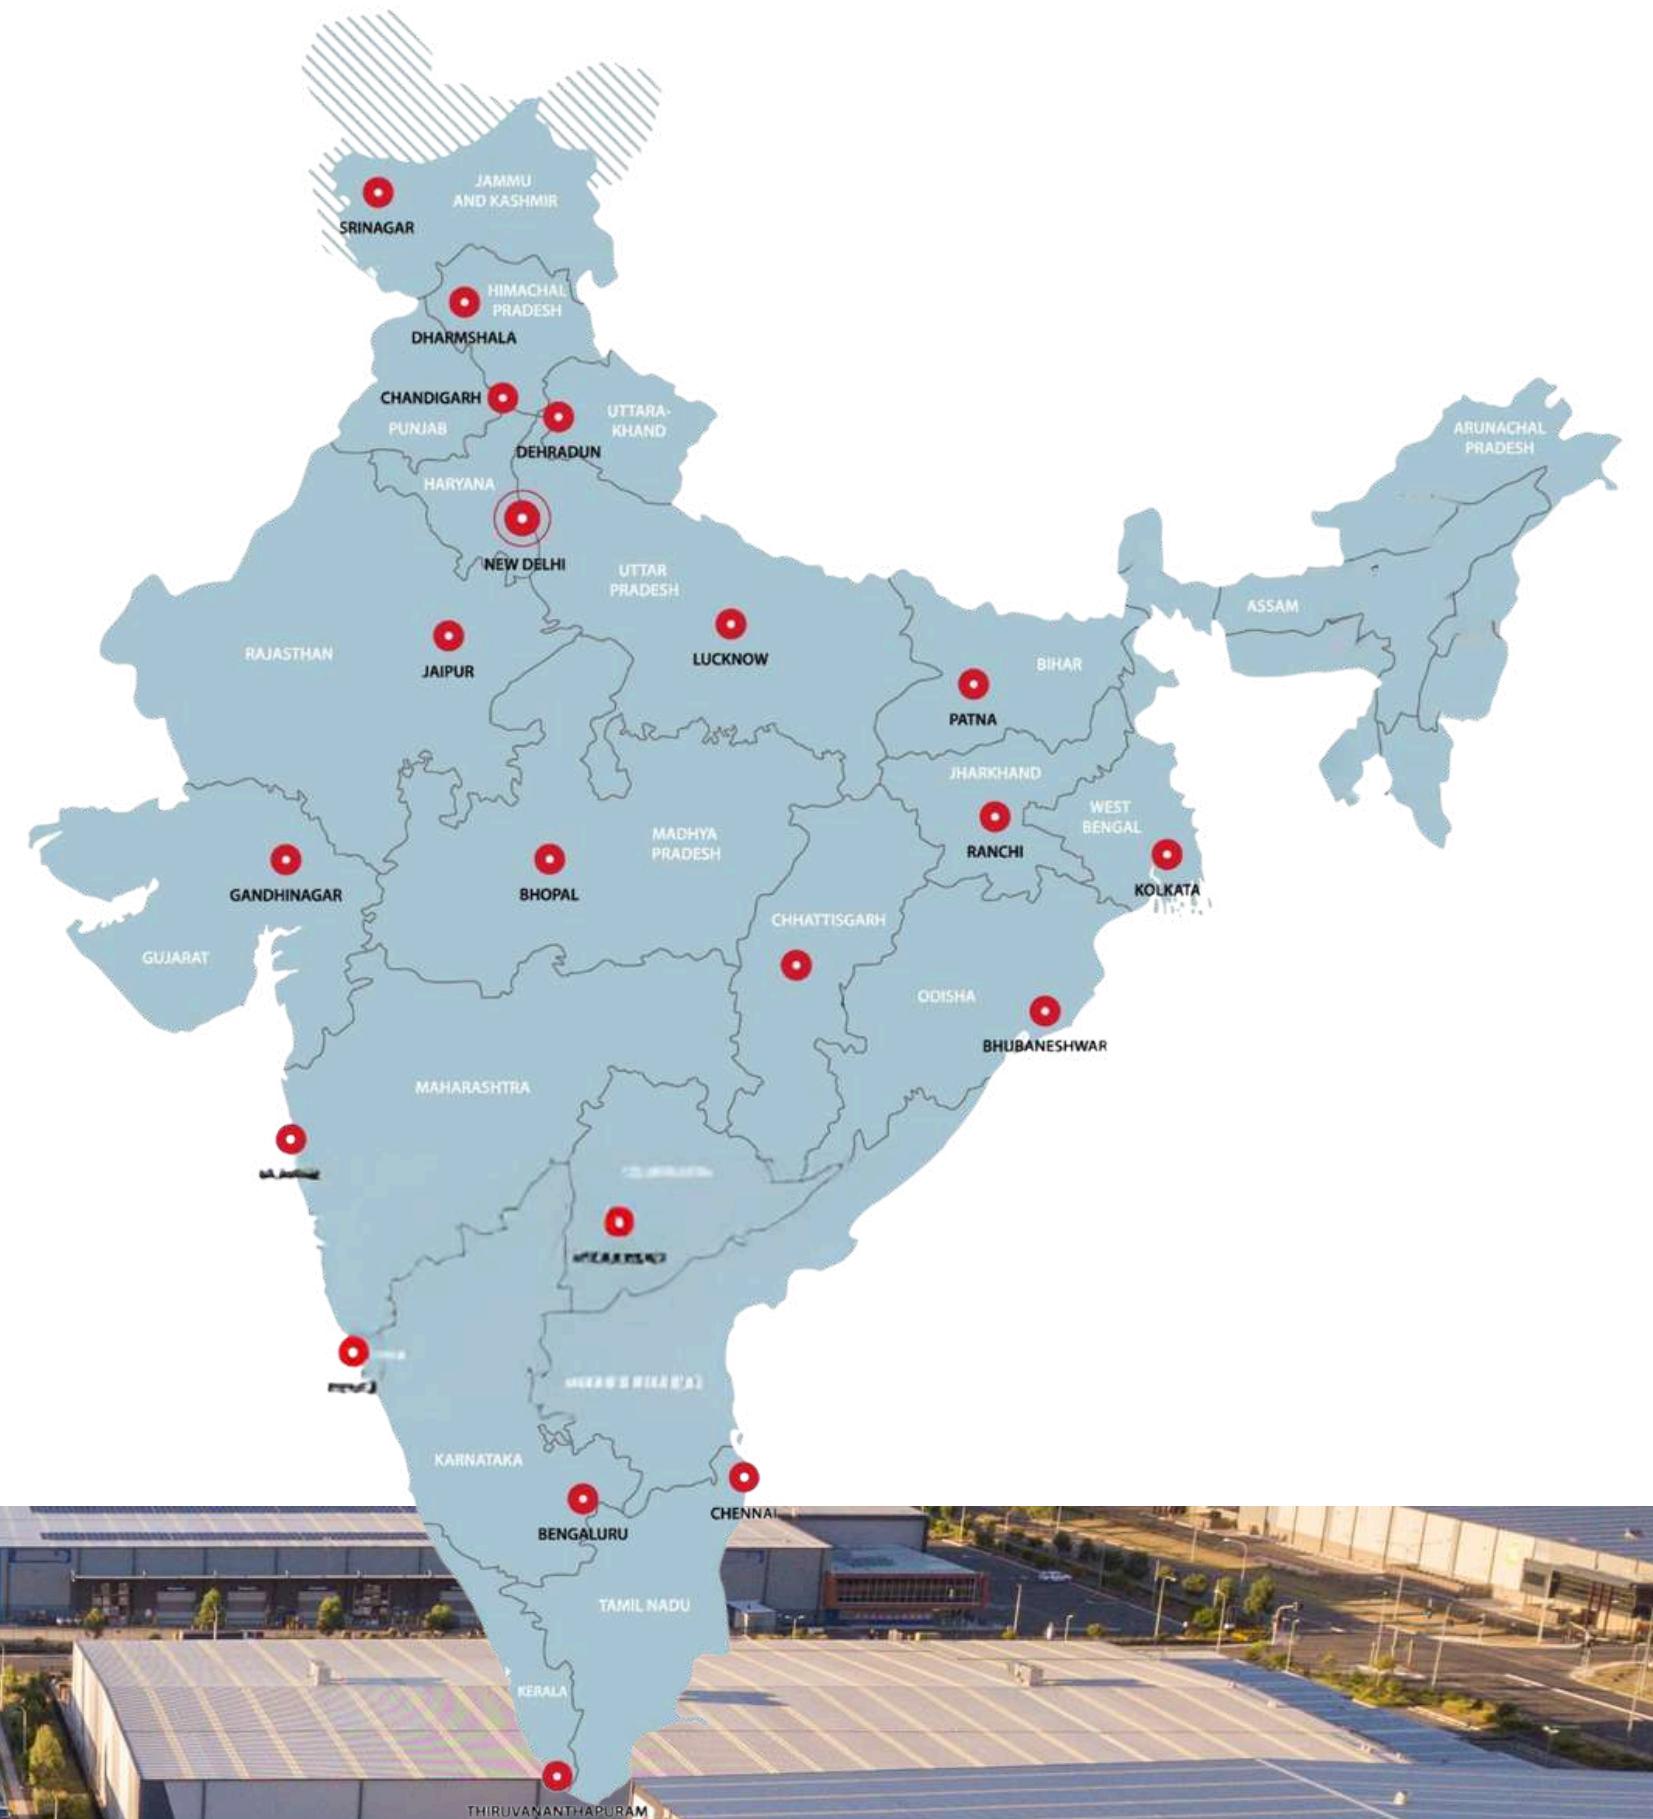

## In-House Transportation Management System (TMS)

- End-to-end shipment visibility
- Route planning & optimization
- Freight cost control and analytics

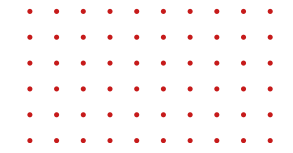

With our **WMS + TMS integration**, clients gain full supply chain visibility, enabling faster decisions, higher efficiency, and lower costs.

# PAN-INDIA NETWORK

- **50+ warehouses** across Tier 1, 2 & 3 cities
- **1M+ sq. ft.** of managed storage space
- Strategic hubs near ports, airports & industrial corridors
- Multi-modal connectivity (road, rail, air & coastal)
- Urban fulfillment centers enabling same/next-day delivery
- Coverage of 95% consumption zones within **24-48 hrs**
- Powered by in-house **WMS & TMS** for real-time visibility

# MISSION & VISION

## Mission

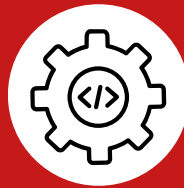

To empower businesses with reliable, sustainable, and future-ready warehousing and logistics solutions that grow with them

## Vision

To become the premier technology-driven logistics partner in India—synonymous with agility, transparency, and excellence.

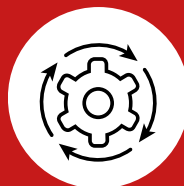

### IN-HOUSE WMS & TMS

Direct control over features, integrations, and SLAs — faster customization and clearer KPIs.

### PAN-INDIA NETWORK

Strategically placed warehouses reduce transit time and costs.

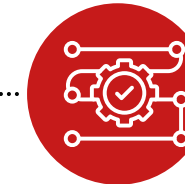

### TECH-ENABLED OPERATIONS

Real-time dashboards, API connectivity and operational automation.

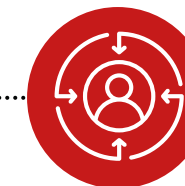

### FLEXIBLE SERVICE MODELS

Dedicated, shared, on-demand and temperature-controlled options.

### END-TO-END CAPABILITY

Warehousing → Order Management → TMS → Reverse Logistics — single accountable partner.

### CLIENT-CENTRIC APPROACH

Dedicated account teams, transparent reporting, and consultative support.
